Prompts	Purpose	AI Response	Evaluation	Modifications
Act as a Senior Software Engineer and Technical Writer. Generate a comprehensive, well-structured, professional Markdown README / Documentation file for my software project based on the following details and guidelines. 1. Project Context & Specifications: 2. Project Name:[e.g., Milk Tea and Beverage Stall POS Application] 3. Target Audience: [e.g., Cashiers, Instructors, Developers] 4. Tech Stack:[e.g., HTML5, CSS3 / Tailwind CSS, JavaScript (ES6+)] Core Functionality & Flow: Browse & select products Milk Tea, Fruit Tea, Water Add items to cart with quantity management (+/-) and deletion Automated subtotal and grand total calculation Cash payment entry with real-time input validation Change computation and transaction receipt generation] Reset option for new transactions	Creating a comprehensive Markdown file containing a structured prompt template designed for generating complete software project documentation **(including a README.md).**	***INSIDED THE .MD***  Milk Tea and Beverage Shop POS Examination Requirements Scenario 3 — Milk Tea and Beverage Shop POS A milk tea and beverage stall near campus serving milk tea, fruit tea, and other cold drinks. Product List Product / Price Classic Milk Tea (Regular) ₱59.00 Wintermelon Milk Tea (Regular) ₱65.00 Taro Milk Tea (Regular) ₱65.00 Fruit Tea — Lychee (Regular) ₱55.00 Brown Sugar Milk Tea (Regular) ₱69.00 Bottled Water ₱20.00 ... ***.MD FILE***  Milk Tea and Beverage Shop POS Examination Requirements Oct 13, 10:42 AM Open I have successfully compiled all text, tables, and requirements into `milk_tea_pos_requirements.md`. Let me know if you need any further assistance!	The prompt requested a comprehensive, production-grade software documentation / **README.md** file (detailing architecture, setup instructions, target audience guides, and system workflows). The model instead generated a requirements / problem specification document **("Milk Tea and Beverage Shop POS Examination Requirements").**	**No Modifications**

make into an AGENTS.md. Technologies to be used are HTML, Tailwind, and JavaScript.	Creating a comprehensive Markdown file containing a structured prompt template designed for generating complete software project documentation **(for AGENTS.md)** to be used in **freebuff**		Successfully converted the project specifications into an AGENTS.md instruction file configured specifically for ***HTML5, Tailwind CSS (via CDN), and vanilla JavaScript.***	**No critical modifications required. The output accurately meets all criteria**.
Refer to AGENTS.md. Before starting ask questions for clarifications.	Creating the whole system through **freebuff** thru reading AGENTS.md		The agent correctly followed the directive to read **AGENTS.md** and paused execution before coding to seek explicit clarification on ambiguous edge cases.	**No immediate changes needed: The agent followed the prompt sequence accurately.**
